

Step 1 - Consider

Is Organics an Option?

If you can answer yes to some or all of these questions then you should consider switching to organic production.

Animal systems

1. Is your current stocking rate below 2 livestock units per Ha?
2. Can your animal housing be modified to incorporate a bedded lying area?
3. Are you considering entering GLAS?

Crop systems

1. Can you incorporate a grass/clover break into your rotation?
2. Do you have a source of farmyard manure/slurry on or near your own farm?
3. Are you interested in achieving gross margins in excess of €1000 per ha for cereal production?

Step 2 - Investigate

1. Get acquainted with the adjustments required by attending farm walk(s), talking to other organic farmers and or contacting a local advisor.

2. Familiarise yourself with the Organic Standards

A major factor distinguishing organic farming from other approaches to sustainable farming is the existence of internationally acknowledged standards and certification procedures. These standards have been developed to provide organic producers with consistent, clear rules as to how organic food should be produced. A two-year conversion period is required before a farm is given organic status.

Some of the main requirements are listed below:

Fertilisers and chemicals

1. Soluble mineral fertilisers are prohibited, but some such as lime and phosphate are permitted.
2. Clover and other legumes supply nitrogen. The balance between fertility building crops, such as grass/clover ley and exploitative crops such as cereals and potatoes is critical in a tillage rotation.
3. Most manufactured agro-chemicals (e.g. herbicides) are prohibited.

Animal welfare

1. The highest standards of animal welfare are obligatory. Permission to carry our mutilations, bedding and generous floor space are required for housed animals.
2. Ruminant stock must be fed a diet which is at least 60% roughage. Tillage crops should be considered as a cost effective alternative to buying in concentrates and bedding.
3. Routine preventative treatment of healthy animals is not allowed, with a focus on prevention rather than cure.

Step 3 - Choose an Organic Certification Body and get an application pack

The Organic Certification Bodies (OCBs) provide an inspection and certification service for all Organic Production Units in Ireland. They have been designated and are regulated by the Organic Unit of the Department of Agriculture, Food and Marine, and are responsible for upholding the organic standards as defined by the EU.

The OCB sends an information pack on request. The pack is tailored to the producers' needs and will generally contain information on the application and conversion process, an application form and a guide to the Organic Standards. Once the application and conversion plan are received and assessed, an initial inspection will be arranged so that if successful, an in-conversion license can be granted.

The OCBs carry out annual inspections of every organic enterprise.

Further information can be sourced from these certification bodies:

IOFGA (Irish Organic Farmers and Growers Association) 13

Inish Carraig, Golden Island, Athlone, Co. Westmeath.

Tel: 090 6433680 [Email: info@iofga.org](mailto:info@iofga.org)

Web: www.iofga.org

Organic Trust, 2 Vernon Avenue, Clontarf, Dublin 3

Web: www.organictrust.ie

Step 4 - Complete a FETAC Course in Organic Production

A **25 hour 'Introduction to Organic Production' course** must be completed before acceptance into the Organic Farming Scheme. For information and booking details on courses held nationwide go to: www.teagasc.ie/organics

Step 5 - Application . Scheme Details to be announced

First, complete a conversion plan and submit along with an application form and other requested documentation to an OCB.

Second, obtain an Organic License no. from OCB to become a "registered organic operator."

Third, apply to Department of Agriculture, Food and Marine to join the Organic Farming Scheme. **Consult with DAFM re: next scheme opening period.**

This requires 2 separate online applications:

- a) Submit separate Organic Farming Scheme (OFS) application ONLINE.
- b) Choose organic or in-conversion land parcels on BPS (Basic Payment Scheme) application ONLINE.

See www.agriculture.gov.ie/farmingsectors/organicfarming for updates and details.

Payment Rates for Organic Farming Scheme 2015 (scheme is presently closed)

	In Conversion (Year 1 & 2)	Maintenance Rate (Years 3, 4 & 5+)
Livestock: 3-60Ha	€220/Ha	€170/Ha
Livestock: Over 60Ha	€60/Ha	€30/Ha
Tillage: Up to 20Ha	€260/Ha	€170/Ha
Tillage: Over 20Ha	€220/Ha	€170/Ha
Horticulture: 1 -6Ha	€300/Ha	€200/Ha
Horticulture: Over 6Ha	€220/Ha	€170/Ha

An additional €30/Ha is available for red clover

Step 6 . The Conversion Process

When the initial inspection has been carried out, the application approved and the “in-conversion licence” granted, a period of conversion begins. Normally two years, this period of conversion allows time for the land and producer to adjust to the organic

During the conversion period, the enterprise must adhere to all the Organic Standards concerning animal welfare, artificial fertilisers, pesticides and chemicals. The changes proposed in the conversion plan must be implemented during this period.

After the required conversion period expires, the inspection body may issue organic status to the farmer (unless conversion period is being extended), which allows the farmer to sell his/her produce as organic.
